

Next Steps

23 CFR 772 Streamlining, Analysis, and Outreach

Adam Alexander
FHWA Air Quality and Noise Team

30 July 2013

Where do we go from here?

- **Guidance**
- **Additional Research Required**
- **Rulemaking**
- **Awaiting Action by Others**
- **Defer to Others**

- **Task 2 Report (Land Use)**
 - Method for determining non-residential receptors
 - Category A process (remains FHWA decision)
- **Task 3 Report**
 - Use for future guidance on feasibility/reasonableness
 - Make tool available

- **Task 4 Report**

- Cost Reasonableness (S&PA)
- Viewpoints (S&PA)
- Noise effects on wildlife (PI)
- Noise compatible land use planning (PI)
- Noise minimization strategies beyond 23 CFR 772 (PI)
- Transportation noise on federal lands (PI)
- TNM validation (PI)

Additional Research Required

- **Task 4 Report**
 - Design build projects (PI)
 - Noise screening procedures (S&PA)
 - Noise abatement feasibility
 - Isolated impacts (S&PA)
 - Uncontrolled access (S&PA)
 - Noise modeling guidelines (PI)

Rulemaking

- Editorial changes
- Clarify alternative abatement measures
- Clean up Categories C & D
- Tighter feasibility/reasonableness criteria (Task 2)
- Consider cost reasonableness (S&PR)
- Design goal applies to front row (Task 3)
- Type I project definition (S&PA)

- **Task 4 Report**

- Integrating noise into the planning process (S&PA)
- Programmatic mitigation plans (S&PA)

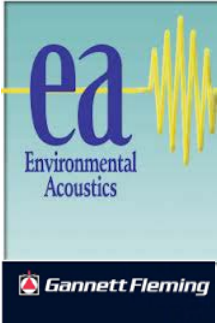

- **Task 4 Report**
 - Reevaluation agreements (S&PA)
 - Noise study documentation (PI)
 - Local programs projects (PI)
 - GIS for noise (PI)

- **Task 4 Report**

- Abatement measure reporting per 23 CFR 772
- TNM compatibility with GIS, CAD and 3rd party software

Questions?
